

STUDENT DIRECTED INQUIRY SDI315117

Subject Expert or Mentor Declaration Form and acknowledgement of students own work

TASC ID:	
Student Name:	

Subject Experts or Mentor Declaration and Comments

The year-long Student Directed Inquiry Report is a rigorous and challenging independent research project following the course providers' teaching of mandatory content. Students are personally responsible for every aspect of their research process. They are required to develop their own research question, choose appropriate and ethical research methods, collect, and process their own data, and demonstrate their critical thinking in an oral presentation as well as display academic integrity. The external subject expert or mentor is requested not to provide the candidate with a research question or research topic, provide use of their organisational techniques and protocols, advanced support or IT technical support, data analysis tools or edit any written work.

I acknowledge that, to the best of my knowledge, the content of this folio is the work of the student identified above.

I was consulted as a subject matter expert / mentor [cross out whichever is not applicable] in the production of this Student Directed Inquiry.

I verify to the best of my knowledge that the folio complies with the TASC External Assessment Rule and the candidate has completed a Candidate Declaration Form as is required by the Academic Integrity Policy and Guidelines.

Subject Matter Expert
